1 defender in each square, they are restricted to a specific square. They should track runners and prevent them from playing out of that square. Attackers can go in any square but it must always be 1v1 in the smaller 15x15 squares. Can the defenders track runs and pass them on when they leave an area. Defenders get 1 point for forcing attacker to back or to the side. Attacker gets 3 points for getting ball into square that is diagonal from them.

Progressions	Coaching Points
Defenders can now move between squares. Attackers can attempt to create 2v1, can defenders see this and track player to force 2v2.	Stay Goalside. Touch tight in a defensive stance Communication to pass player on (where and when).

Players go 3v3 game with 3 target players in gates. The players inside the grid will score points by passing the ball to one of their target players. When the target receives the ball, then the 3 target players enter the field to play against the team that just scored while the other team of 3 take their place as the new target players. Offside rule must apply.

Progressions	Coaching Points
Add wide neutral bumper players - effectively a 5v3 so more players to track and/or pass on	Defend as a unit, as soon as 1 player chases a ball out of position the full unit breaks down. Allow players to run offside, don't drop deeper and allow a higher attack
